★★★★★ **Must read for anyone looking to live a life on purpose and a great gift for those you love**

 Someone I respect recommended I order a copy of Jairek Robbins' book: Live It! I had four books on my nightstand already, but something about the title "Achieve Success by Living with Purpose" resonated with me and so I pulled back the cover. Wow. I wanted to read through the whole book at once because the information was so relevant and inspiring. What is brilliant about this book however, is that it is almost like a workbook and the chapters have little challenges for you to actually put the teachings into practice. You are invited and encouraged to reflect and then take action. Just the exercise of imagining and writing down what your "Ideal Day" is like makes this book mandatory for anyone really looking to take their life to the next level and off automatic. The book flows - personal stories as well as those of others interspersed with lessons and exercises. I am actually in a book club and I must say it is a wonderful way to experience the book. I've already sent 2 copies out to friends of mine as a way to say thank you. Highly recommend.
